### **DETAILED ACTION**

This is in response to Applicant's reply dated 5/5/09. Claims 30-58 have been examined.

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 30-58 are rejected under 35 U.S.C. 102(b) as being unpatentable by McCanne et al. (US 6,415,323) hereafter McCanne, which has been presented in the previous office action dated 12/5/08, incorporated here by reference.**

#### ***Response to Arguments***

3. Applicant's arguments filed 5/5/09 have been fully considered but they are not persuasive.

I. Applicant argues that McCanne does not disclose any usage rules or other limitations on restricting the routing of a service request. The usage rules include a time condition that defines the maximum time gap for using the addressing information from the first time it is used, and maximum usage condition defining the number of times the addressing information can be used.

**Examiner's Response:**

McCanne teaches load balancing considerations involved in server selection, which include server health parameters like server capacity, anticipated server delay, etc. [McCanne: Col. 12 / lines 7-15]. For a maximum usage condition, McCanne teaches how ARNs must determine which service nodes are available and are not overloaded [McCanne: Col. 12 / lines 62-64]. Also, McCanne teaches the functional equivalent of a time-out condition, where ARNs time out a SN entry that was not refreshed [McCanne: Col. 13 / lines 18-20]. McCanne's database with SN entries is simply an efficient tool for making routing decisions based on load balancing considerations, which include usage and time-out conditions. Applicant is advised to narrow the scope of claim language in order to overcome the teachings of McCanne.

II. In view of arguments above, the rejection is maintained.

***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
